

E. KIM Evaluation of Instruction Program Report

16S: COMPTNG 10A DIS 1C: INTR TO PROGRAMMING

No. of responses = 21

Enrollment = 30

Response Rate = 70%

Survey Results

1. UCLA Department of Mathematics:

1.1) How would you rate your TA as an effective teacher?

n=21
av.=8.67
md=9
dev.=0.58

1.2) How would you rate the availability and helpfulness of your TA outside of the classroom?

n=20
av.=8.2
md=9
dev.=1.15
ab.=1

1.3) What is your rating of this course independent of the effectiveness of the TA?

n=21
av.=7.05
md=8
dev.=1.72

Profile

Subunit: MATH

- Awesome guy
 - Eric couldn't be better. He's extremely helpful and teaches to our needs. He's so effective that our class is almost always full, despite the fact that his sessions are optional and at 8am
 - Eric is a great TA who really seems to care about his student's learning and success. He is also a kind and funny guy. I would love to have him as a TA again.
 - Eric is a great TA. His website where he posts practice problems and solutions is what is helping me most in this course. He is also always available to answer your questions and responds to email almost immediately. Thanks for being such a great TA eric, hope to have you in future classes as well
 - Eric is simply terrific! I wish I knew that earlier- I would attend his TA sessions religiously! Because of my tight schedule and the difficulty of this course, I have been struggling this quarter.. Eric is such a savior! His practice problems are extremely helpful for reinforcing what we learned in lecture and preparing for tests! Too bad I cannot have him as my TA.. since I am only required to take pic10a. He's very approachable too- not intimidating at all to ask him questions. The biggest complain I have is that he only has one office hour per week..Oh I do have one suggestion: if possible, please try to write larger and clearer on the blackboard ^^ Thank you Eric!
 - Eric was a very effective TA. He elaborated on what the professor couldn't explain too well in lecture and made everything more clear. His notes, practice problems, and resources made the class more manageable. He really knew how to talk and teach to the students.
 - Eric was an knowledgeable and clear and effective in his teaching. He was always available to students and went out of his way to help us by staying past his scheduled office hours.
 - Eric you are an amazing TA! You were able to clarify all the confusing parts in lecture through discussion and you're seemingly 24 hour email responses. Moreover, you were able to brilliantly reinforce material through your biweekly discussion problems and notes. Thanks for being awesome!
 - Excellent TA! Extremely patient and provided worksheets for practice with solutions to help with coding. Eric is super thorough with the material he goes through, which cleared up a lot of confusion from lecture. Probably the best TA I've had thus far at UCLA.
 - I liked Eric Kim the TA. His packets he gave us during the sections were nice and helpful. The exams in the actual course were far too hard. The averages were all of them were like less than 50 percent and not enough time was allotted.
 - I really liked that you provided us with notes each week and gave us practice problems!
 - Practice problems and notes provided in class were very helpful.
As a TA, one of the most effective and time-efficient I've had. Really helped bring home the material.
 - TA was excellent, the worksheets were very helpful, although I do wish we spent more time going over them in class to better flesh out ideas.
 - This guy was great, highly recommended. Very thorough and effective explanations.

- Very helpful TA; very knowledgeable on the materials; often available to answer questions; very good at helping me find the bug and giving me suggestions to fix it. Great TA overall.

- excellent TA. not the best ive ever had but quite good. my one concern is: the TA began teaching during discussion sections too so it was like I received two lectures. this was EXTREMELY helpful primarily [redacted] the TA was SUCH a better explainer and the TA made the concepts so much clearer [redacted] exceptionally. aka this TA was pretty good but he stopped doing this second lecture during discussion, so Im SOOO confused right now in regard to data structures and everything. I failed to understand the "functions" section comprehensively too because the TA stopped with these "second lectures" prior to this section as well. AKA, teach more in discussion and do less problems! i can do the problems on my own time and evaluate the answers on my own time. TEACH ME. i cannot learn on my own time.
